ATTIC LADDER

FOLDING AND RETRACTABLE

**Wooden or metal
Insulated or non-insulated**

- Box frame is made of wood.
- The deployment mechanism facilitates the handling of the attic ladder in a considerable way.
- The hatch can either be isolated or not. Thermal insulation provides protection against heat loss.
- The wooden ladders are made of high pine quality and consist of three parts.
- Metal ladders with double hinges guarantee a high degree of robustness. Coated with a resistant powder varnish.
- Quality hardware that contributes to the rigidity of the box and the ladder.
- Grooved wooden steps or bumpy metal ladders available.
