## EcoBatt Insulation by Knauf with ECOSE technology

# ECOBATT<sup>MD</sup>

**EcoBatt insulation is made of inorganic glass fibers and linked together using ECOSE technology.**

### ECOSE Technology

Knauf Insulation products with Ecosse Technology are made using our patented, bio-based blinder-a smarter alternative to the phenol/formaldehyde binder traditionally used in fiberglass products.

### Applications

Ecobatt insulation products can be used in new and retrofit wood and metal frame applications in residential, commercial and manufactured housing structures. It is intended for thermal and acoustic applications for the insulation of walls, ceilings and floors. Knauf Insulation offers a full selection of standard and high density EcoBatt mats in a wide range of formats and R-values.

### Acoustical performance

Ecobatt insulation provides excellent acoustical properties and will reduce sound transmission when properly installed in partition walls and acoustical ceiling and floor systems.

EcoBatt insulation is naturally brown. Ecosse technology ensures that no phenol, formaldehyde, acrylic or artificial colors are used during manufacturing.

Superior technology.  
Consistent quality,  
little dust  
and easy to cut.

Knauf Insulation manufactures a full range of EcoBatt products.  
A variety of widths,  
R values, densities and coatings.
